

Accreditation Status Update — ACCSC Continued Warning

Orion Institute is providing this notice to current and prospective students regarding an update to the institution's accreditation status.

The Accrediting Commission of Career Schools and Colleges (ACCSC) has **continued Orion Institute on Warning** following its May 2026 Commission meeting. Orion Institute **remains accredited by ACCSC** while on Warning and continues to provide educational services to its students.

ACCSC has identified the following three areas for which Orion Institute must demonstrate compliance with the Commission's accreditation standards:

- **Continuity of Management and Administrative Capacity** — ACCSC has requested additional information and documentation regarding the institution's management and administrative staffing, including staff retention, continuity of management, on-site supervision, and the availability and delivery of student services.
- **Graduate Employment Verification** — ACCSC has requested additional documentation demonstrating that reported graduate employment outcomes are supported by appropriate and verifiable records and that graduate employment classifications are properly documented and verified in accordance with ACCSC requirements.
- **Required ACCSC Fees** — ACCSC identified previously outstanding accreditation-related fees as part of its Continued Warning action. Upon identification of the outstanding invoices, Orion Institute immediately remitted payment, and ACCSC has confirmed receipt and deposit of those payments. Accordingly, the previously identified outstanding amounts have been addressed.

Orion Institute is actively addressing the Commission's remaining requirements and preparing the documentation and information requested by ACCSC to demonstrate continued compliance with the Standards of Accreditation. The Commission has scheduled a subsequent review of Orion Institute's Continued Warning status for its November 2026 meeting.

Orion Institute remains accredited by ACCSC. The institution remains committed to maintaining compliance with ACCSC accreditation standards and to providing its students with educational programs and student services consistent with those standards.

For additional information regarding the Commission's action and ACCSC's public summary of the grounds for the Continued Warning, please visit:
